

RULES

Mobile Ag Ed Science Lab

Scientists who work on the Mobile Ag Ed Science Lab
have special rules to follow.

Following these rules is especially important,
because on the lab you have limited work **SPACE** and
limited work **TIME**.

1. Put **NOTHING** in your mouth. Not even your fingers.
2. Work cooperatively in your group.
3. Listen carefully to directions, **AND** follow them exactly.
4. Take complete and careful notes on all investigations. (You will have time when you return to class to rewrite your experiment.)

*Following these rules will
enable you to complete
interesting experiments.*
